Al Baath University - 2017 To 2022

Software Engineering, degree: 86%

👤 Work Experience

- **HNNDES - January 2023 To Now**

  Front-End Developer (React.js)

  > *The company is located in **Homs-Syria**, and the work is **on-site**.*

  - I am part of a React team containing 3 developers.
  - We are working on several projects with different objectives.
  - We are using a *clean architecture* in coding.
  - We organize our work with *GitLab.*

- **Stack Soft Co. - October 2022 To January 2023**

  Front-End Developer (React.js) & XD Designer

  > *The company is located in **Jordan**, and the work is **remotely**.*

  - We worked with Saudi Arabia to develop a system of cleaning services.
  - The system helped facilitate cleaning operations in general, including mobile and desktop applications and websites.
  - I have worked in (Admin, User) websites and landing page.
  - It supports four languages (Arabic, English, Hindi, and Urdu).

- **Al Baath University - February 2018 To June 2021**

  Contestant in International Collegiate Programming Contest (ICPC)

  > *ICPC: A software competition among university students. which is known on an international level.*

  - Good teamwork and ability to withstand pressure.
  - Ability to solve problems as fast as possible.
  - Writing and running clean, uncomplicated, accurate code.

🗛 Languages

English: Upper-Intermediate

✅ Projects

- **Simple Cocktail Bar**

  Front-End Developer (React.js)

  https://cocktails-bar-site.netlify.app/

  - The system enables you to specify your favorite cocktail and shows you the most similar types.
  - It supports two languages (Hindi and English).

- **Welcome Saudi Cleaning Services**

  Front-End Developer (React.js)

  https://welcome-saudi-cleaning-services.netlify.app/

  - The system explains the services it provides to admins and users.
  - It provides links to Windows App, iPhone App, Android App, and Website.
  - It supports two languages (Arabic and English).

- **Saudi Cleaning Services (Admin Side)**

  Front-End Developer (React.js)

  https://admin-site-cleaning-services.netlify.app/

  - The system helped the admin (System Owner) to manage laundromats and deliverymen.
  - The admin can view global daily statistics about all services.
  - The admin can accept or reject laundromats and deliverymen join requests.
  - The admin can view all laundromats and their offers in addition to the offer requests.
  - The system provides an *Accounting part* for the admin to manage financial matters.
  - It supports four languages (Arabic, English, Hindi, and Urdu).

- **Saudi Cleaning Services (User Side)**

  Front-End Developer (React.js)

  https://user-cleaning-service.netlify.app/

  - The system served users by cleaning their stuff from home.
  - Users can view a list of laundromats with their price offers.
  - Users can choose the laundromat that suits their needs and their budget.
  - The system provides E-payment.
  - It supports four languages (Arabic, English, Hindi, and Urdu).

- **Software Application for note-taking on videos (VidNote)**

  Front-End Developer (React.js)

  - Built a **full-stack web app** with a team of my university colleagues to pass the **4th** year, I was the **front-end web developer** on it and used **React.js**. Also, I designed the web app on **Figma**.
  - Dealing with **YouTube API** to get the video and its information through the link entered by the user.
  - We aim to empower the user to take (notes, interactive questions) during a specific moment of the video and return to this moment later. In addition, the user can share the videos and his notes with other users.

- **Virtual Roaming - February 2022 To August 2022**

  Front-End Developer (React.js)

  http://tajwal.herokuapp.com/Welcome

  - Built a **full-stack web app** with a team of my university colleagues as a graduation project. I was the **front-end web developer** on it and used **React.js**. Also I designed the web app on **Figma**.
  - Dealing with **maps**, maps in the web app are provided using Mapbox service. In addition, I used **Axios** to send and receive data from the database.
  - We aim to find a new way for roaming and shopping. Serving 2 main parties: the shop owner and the customer. The project also aims to recommend stores and products to the customer, based on his previous interaction with other stores and products. On the other hand, The project increases the ability of the shop owner to compete with other shops by ordering the highest-rated shops for the customers.
